

Eye film template

Print at 100% (actual size). Turn off Fit, Shrink and Scale to page.

Check the 50 mm bar and the 20 mm square with a ruler before cutting.

Cut two windows from clear, flexible film (a transparency sheet works).

Start with size A. If A is loose in the groove, cut B; if A is tight, cut C.

Cut on the line, keep the corners smooth, and don't crease the film.

A

A: 12.6 × 8.6 mm, corner radius 4.2 mm

Start here

B

B: 12.7 × 8.7 mm, corner radius 4.25 mm

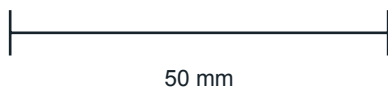

If A is loose

C

C: 12.5 × 8.5 mm, corner radius 4.15 mm

If A is tight

50 mm

20 × 20 mm square

Each window sits in the groove behind the goggle's front lip, with a 14 × 10 mm piece of 4 mm white foam behind it.
